

Smart Home? Check!

To make sure you think of every step during the construction phase of your smart home, we compiled a short checklist with the most important areas of application.

Lighting

- Basic lighting by LED recessed spots
- Effect lighting with LED strips
- Accent lighting LED Pendulum Slim
- Outdoor lighting/garden lighting

Notes - Lighting

Control

- Touch / Touch Pure
- Touch Pure Flex
- Tablet holder in the living area
- Touch Surface
- Touch Nightlight
- Remote Air

Notes - Control

Climate control (heating, cooling, ventilation)

- Possibility to control a decentralized ventilation system (Leaf/Internorm/etc.)
- Possibility to control the heating and circulation pumps (e.g. air heat pump)

Tip: The earlier you start with the planning phase of a smart home, the smoother the construction phase will be. All companies involved should be informed that your new home will be a Loxone smart home.

A Loxone smart home is characterized by its 360° solution. The individual components of a Loxone smart home work hand in hand with the customized software, thus, enable you to enjoy a one-of-a-kind smart home lifestyle.

This checklist serves as a guide. More in-depth support for planning your smart home is provided by our certified Loxone partners.

loxone.com/find-a-partner
